

Z Accumulation GBP | Data as at 30.09.2023

Fund objectives and investment policy

The Fund aims to provide an income of 3% to 5% per year and capital growth by investing in a diversified range of assets and markets worldwide with a target average annual volatility (a measure of how much the Fund's returns may vary over a year) over a rolling five year period of between 50% to 65% of that of global stock markets (represented by the MSCI All Country World index). This is not guaranteed and could change depending on market conditions.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Z Accumulation GBP | Data as at 30.09.2023

10 year return of GBP 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Capital erosion: As a result of fees being charged to capital, the distributable income of the fund may be higher, but there is the potential that performance or capital value may be eroded.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The portfolio may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference interest rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Investments in other collective investment schemes: The fund will invest mainly in other collective investment schemes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund. Failures at service providers could lead to disruptions of fund operations or losses.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Synthetic risk & reward indicator (SRRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Risk Rating

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

The Fund's performance should be assessed against the income target of 3-5% per year, and compared against the Investment Association Mixed Investment 20% to 60% Shares sector average return.

Benchmarks:

On 24.03.2014, the Fund, previously named Cazenove Diversity Income Fund, changed its name to Schroders Multi-Manager Diversity Income Fund. Benchmark names in this document may be abbreviated. Please refer to the funds' legal documents for the full benchmark name.

The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

On 12.11.2021 Schroder MM Diversity Income Fund changed its name to Schroder Income Portfolio. Please note that the fund's investment objective, policy and benchmarks were changed on 12 November 2021.

Source and ratings information

Important information

Costs:

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.
