

WealthSelect Managed Passive 5

All data as at 31 August 2023

Stuart Clark
Portfolio Manager

Portfolio objective

The WealthSelect Managed Passive 5 portfolio aims to achieve capital growth over a period of five years or more through a diversified range of investments in the UK and globally.

The portfolio is matched to a risk profile that targets a specific range of volatility of between 45% - 55% of the expected annualised volatility of global equities over the next 10 years and is managed to stay within this range most of the time.

| Performance comparator | Volatility target | Weighted fund charge | MPS charge |

Glossary

Performance comparator

The IA Mixed Investment 20-60% Shares sector is representative of funds with exposure to a broad mix of asset types. The portfolio's allocations to these asset types may be different to the average sector allocation and therefore the performance of the portfolio and the comparator may differ.

Volatility target

One of the main measures of investment risk is volatility, which is a measure of the amount an investment rises and falls over time. The portfolio targets a range of volatility rather than a particular level of growth.

Weighted fund charge

The weighted fund charge is the weighted average of the charges of the underlying funds held in the portfolio.

MPS charge

The MPS charge is the amount charged annually by Quilter for running the portfolios. We will deduct the charge on a monthly basis from your account. The charge is expressed as a percentage of the investment held within the Managed Portfolio Service.

Important information

Further information on the WealthSelect Managed Portfolio Service can be found at www.quilter.com/wealthselect

Past performance is not a guide to future performance and may not be repeated. Investment involves risk. The value of investments and the income from them may go down as well as up and investors may not get back the amount originally invested. Because of this, an investor is not certain to make a profit on an investment and may lose money. Exchange rates may cause the value of overseas investments to rise or fall.
