

# Sustainable Impact Model Portfolio Service (SIMPS)

Medium-high risk | September 2023 | For financial advisers

## Portfolio description

The **SIMPS Portfolio** range provides a combination of risk-adjusted returns and positive impact: investing that **does well** and **does good**. The portfolios aim to achieve capital appreciation whilst reducing investment risk via a diversified, multi asset class portfolio.

The strategy is based on **actively managed asset allocations** across equities, fixed income and cash. We invest in funds which align with our investment philosophy; businesses that **avoid controversies**, are **well run** and **solving major global challenges**.

## This month

During September, the future path of interest rates continued to dominate market sentiment all over the world. There are fears that the US Federal Reserve bank will have to keep interest rates higher for a longer amount of time. There are also fears regarding the sustainability of the level of US government debt. The combination of these concerns meant that the yield on the 10-year US treasury bond moved beyond 4.5%, the highest level seen since the 2008 global financial crisis. The uncertainty this caused led to a sell-off in global equities, which fell by 3.3% this month.

Additionally, Saudi Arabia and Russia's decision to cut their oil production led to fears of a global shortage. The announcement resulted in the Brent Crude price, one of the two main benchmark prices for purchases of oil worldwide, to surpass 95 US dollars a barrel. This increase in global oil prices has the potential to lead to higher inflation.

The clean energy sector experienced another sell-off in September, following what was also a weak August. This was primarily driven by higher interest rates and continued imbalances between supply and demand for clean energy products like electric vehicle charge points. Despite this, we remain optimistic about the future outlook for the environmental theme, especially considering that September was the hottest month on record.

## RETURN METRICS\*

**NET PERFORMANCE:** The SIMPS medium-high risk performance is shown after Tribe's management fee (0.25%) and the underlying fund managers' fees (OCF of 0.72%\*\*) have been deducted. But it does not include platform and adviser charges. Please note, for the period since inception to 28/02/22 performance is reported net of VAT. Past performance covers 31/12/2018 (when the medium-high SIMPS was established) to 30/09/2023. Past performance does not exist prior to this period. Past performance is not a reliable indicator of future results.

**BENCHMARK:** ARC Benchmarks are calculated by collecting actual performance from over fifty investment managers. The steady growth PCI is suitable for strategies with a relative volatility of 60-80% of global equities as measured by MSCI ACWI.
