# Passive MPS 1

As at 31 October 2023

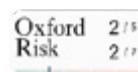

## Investment objective

AJ Bell Passive MPS 1 aims to make a positive return when measured over a period of at least five years, this may be less than the level of inflation (as measured by the consumer price index). Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price.

## Risk profile<sup>(1)</sup>

For investors who wish to maintain their capital investments and are not able to tolerate larger short-term dips in the value of their portfolio that may arise from exposure to the stock market. The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

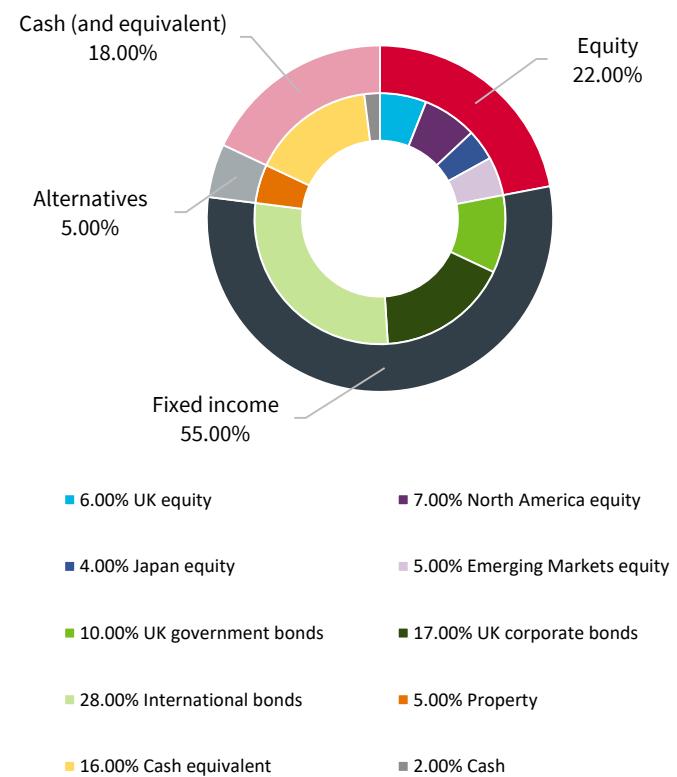

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as index funds and ETFs. These products mainly hold typically lower risk assets such as cash and bonds, with smaller holdings in company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Fees and charges

Ongoing charges figure (OCF)	0.28%
Transaction costs	0.04%
Total indicative charge	0.32%

Ongoing Charges Figure (OCF) is inclusive of the AJ Bell Investments Annual Management Charge (fee of 0.15%) and the ongoing charges of underlying investments. MPS transaction costs reflect the aggregated transaction costs reported by underlying products. In some instances products may deploy pricing mechanisms which can result in negative costs Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. Any charges payable to your financial adviser will apply in addition. There is no set minimum into the MPS, however, the structure of the underlying investments means that the portfolios work more efficiently for investments above a certain size. For the Passive MPS, this is around £20,000. It should be noted that the smaller the investment amount, the greater the impact of transaction costs will be on the investment.

Source: Morningstar as at 31 October 2023.

Performance is calculated on a net of fees basis. Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the portfolio. However, to give context and enable an objective assessment of the portfolio's performance, the IA (Investment Association) Mixed Investment 0-35% Shares sector average is included for reference. The portfolio does not aim to track the IA sector as a benchmark.

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings. This model was launched on 18 August 2016.

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each portfolio is likely to vary from its average over time. This is measured on a forward looking basis and is used to help you understand the level of risk taken in each portfolio.

Expected volatility 4.20% - 6.30%

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time. For further details of all applicable costs, please speak to your financial adviser or visit [www.investcentre.co.uk](http://www.investcentre.co.uk).

(1) The AJ Bell Managed Portfolio Service (MPS) have been risk mapped by independent risk profiling services. View our Risk Profiling Tools document on [www.investcentre.co.uk/support/infocentre](http://www.investcentre.co.uk/support/infocentre) for further information. The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Allocation and performance information contained in this document is representative of the standard Passive MPS 1 model held on AJ Bell Investcentre. The implementation of this model may vary when held via other platforms, for example, where access to certain share classes is restricted. This may lead to differences in allocation and performance.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

# Passive MPS 2

As at 31 October 2023

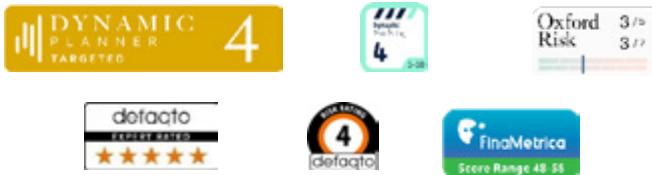

## Investment objective

AJ Bell Passive MPS 2 aims to make an average return in line with inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price.

## Risk profile<sup>(1)</sup>

For investors who can tolerate some shorter-term capital loss from their portfolio, as markets fluctuate.

The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

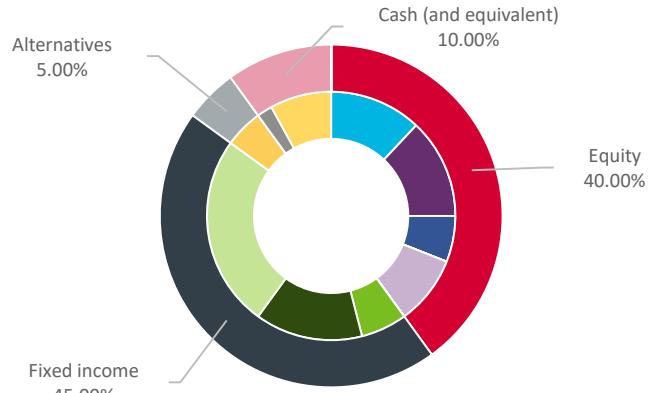

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as index funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

# Passive MPS 5

As at 31 October 2023

## Investment objective

AJ Bell Passive MPS 5 aims to make an average return above the level of inflation (as measured by the consumer price index) over a period of at least five years. In favourable market conditions returns may be higher. Over shorter periods the portfolio may suffer significant losses in capital value, as it invests in securities that can go both up and down in price, with large weights in emerging markets.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as index funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

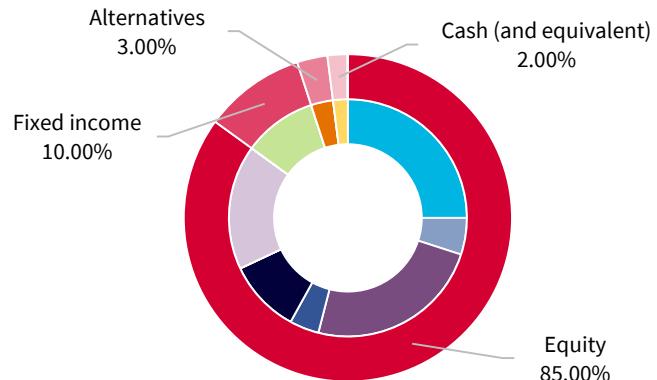

Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile<sup>(1)</sup>

For investors who understand the risk and reward relationship of pure equity portfolios over the short, medium and long term. The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

Passive MPS 5	3.13	2.73	29.25	28.28	40.74
IA Flexible Investment	1.86	-8.41	10.88	11.64	20.20
IA Sector quartile	2nd	1st	1st	1st	1st

(4) The above table shows the total return of the portfolio on a cumulative basis over the previous five years. This is taken from the most recent month end.

Source: Morningstar as at 31 October 2023.

Performance is calculated on a net of fees basis. Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the portfolio. However, to give context and enable an objective assessment of the portfolio's performance, the IA (Investment Association) Flexible Investment sector average is included for reference. The portfolio does not aim to track the IA sector as a benchmark.

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings. This model was launched on 18 August 2016.

## Fees and charges

Ongoing charges figure (OCF)	0.28%
Transaction costs	0.06%
Total indicative charge	0.34%

Ongoing Charges Figure (OCF) is inclusive of the AJ Bell Investments Annual Management Charge (fee of 0.15%) and the ongoing charges of underlying investments. MPS transaction costs reflect the aggregated transaction costs reported by underlying products. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. Any charges payable to your financial adviser will apply in addition. There is no set minimum into the MPS, however, the structure of the underlying investments means that the portfolios work more efficiently for investments above a certain size. For the Passive MPS, this is around £20,000. It should be noted that the smaller the investment amount, the greater the impact of transaction costs will be on the investment.

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each portfolio is likely to vary from its average over time. This is measured on a forward looking basis and is used to help you understand the level of risk taken in each portfolio.

### Expected volatility

12.60% - 14.70%

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time. For further details of all applicable costs, please speak to your financial adviser or visit [www.investcentre.co.uk](http://www.investcentre.co.uk).

(1) The AJ Bell Managed Portfolio Service (MPS) have been risk mapped by independent risk profiling services. View our Risk Profiling Tools document on [www.investcentre.co.uk/support/infocentre](http://www.investcentre.co.uk/support/infocentre) for further information on our risk profilers. The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Allocation and performance information contained in this document is representative of the standard Passive MPS 5 model held on AJ Bell Investcentre. The implementation of this model may vary when held via other platforms, for example, where access to certain share classes is restricted. This may lead to differences in allocation and performance.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

# Passive MPS 6

As at 31 October 2023

## Investment objective

AJ Bell Passive MPS 6 aims to make an average return substantially ahead of inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may suffer significant losses in capital value, as it invests in securities that can go both up and down in price, with large weights in emerging markets and high growth companies.

## Investment approach

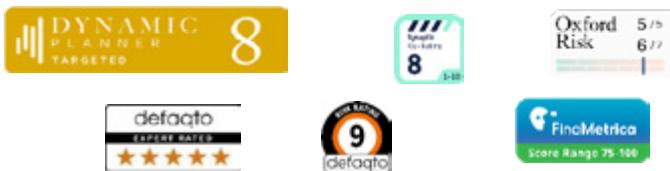

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as index funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

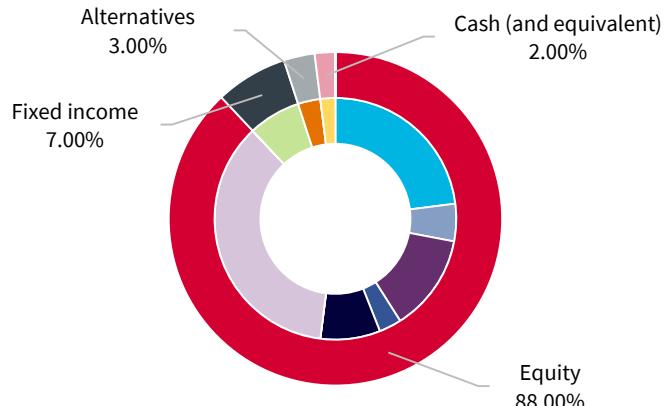

Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile<sup>(1)</sup>

For investors who understand the risk and reward relationship of pure equity portfolios over the short, medium and long term. The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

# Passive Income MPS 1

As at 31 October 2023

## Investment objective

AJ Bell Passive MPS Income 1 aims to minimise the risk of losing value, whilst delivering a sustainable income when measured over a period of at least five years.

Over shorter periods the portfolio may lose value, including sharp falls in certain market conditions, as it invests in securities that can go both up and down in price.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as index funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

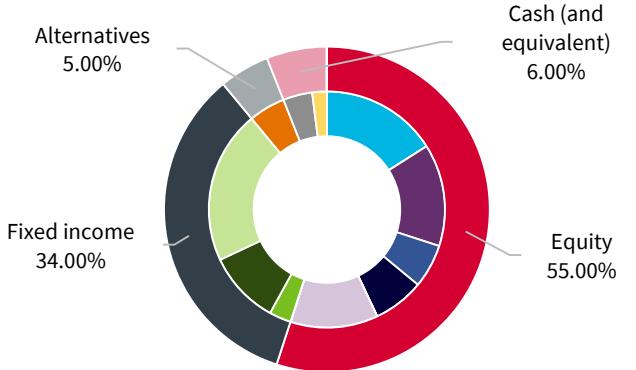

To deliver income the portfolio invests in a wide range of income focused index strategies. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile<sup>(1)</sup>

For investors who understand the risk and reward relationship of pure equity portfolios over the short, medium and long term. The portfolio invests in funds and exchange traded funds (ETFs), using a risk-based strategic asset allocation process to deliver returns.

# Active MPS 1

As at 31 October 2023

## Investment objective

AJ Bell Active MPS 1 aims to make a positive return when measured over a period of at least five years, this may be less than the level of inflation (as measured by the consumer price index). Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products mainly hold typically lower risk assets such as cash and bonds, with smaller holdings in company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

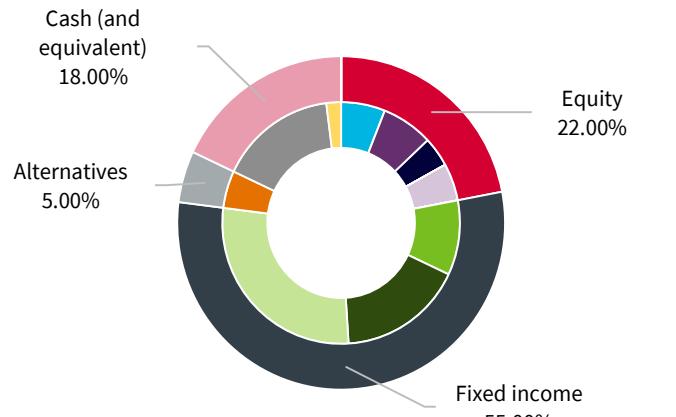

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. The portfolio looks to gain exposure to high quality active managers who have the potential to outperform markets over time, but it will only use these where there is conviction that this still makes financial sense after fees have been deducted. Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile<sup>(1)</sup>

For investors who wish to maintain their capital investments and are not able to tolerate larger short-term dips in the value of their portfolio that may arise from exposure to the stock market.  
The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

IA Sector quartile	2nd	1st	1st	1st	1st

(4) The above table shows the total return of the portfolio on a cumulative basis over the previous five years. This is taken from the most recent month end.

Source: Morningstar as at 31 October 2023.

Performance is calculated on a net of fees basis. Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the portfolio. However, to give context and enable an objective assessment of the portfolio's performance, the IA (Investment Association) Mixed Investment 0-35% Shares sector average is included for reference. The portfolio does not aim to track the IA sector as a benchmark.

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings. This model was launched on 19 February 2018.

AJ Bell Management Limited (company number 03948391), AJ Bell Securities Limited (company number 02723420) and AJ Bell Asset Management Limited (company number 09742568) are authorised and regulated by the Financial Conduct Authority. All companies are registered in England and Wales at 4 Exchange Quay, Salford Quays, Manchester M5 3EE. See website for full details.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

## Fees and charges

Ongoing charges figure (OCF)	0.56%
Transaction costs	0.11%
Total indicative charge	0.67%

Ongoing Charges Figure (OCF) is inclusive of the AJ Bell Investments Annual Management Charge (fee of 0.15%) and the ongoing charges of underlying investments. MPS transaction costs reflect the aggregated transaction costs reported by underlying products. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. Any charges payable to your financial adviser will apply in addition. There is no set minimum into the MPS, however, the structure of the underlying investments means that the portfolios work more efficiently for investments above a certain size. For the Active MPS, this is around £10,000. It should be noted that the smaller the investment amount, the greater the impact of transaction costs will be on the investment.

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each portfolio is likely to vary from its average over time. This is measured on a forward looking basis and is used to help you understand the level of risk taken in each portfolio.

### Expected volatility

4.20% - 6.30%

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time. For further details of all applicable costs, please speak to your financial adviser or visit [www.investcentre.co.uk](http://www.investcentre.co.uk). (1) The AJ Bell Managed Portfolio Service (MPS) have been risk mapped by independent risk profiling services. View our Risk Profiling Tools document on [www.investcentre.co.uk/support/infocentre](http://www.investcentre.co.uk/support/infocentre) for further information on our risk profilers. The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Allocation and performance information contained in this document is representative of the standard Active MPS 1 model held on AJ Bell Investcentre. The implementation of this model may vary when held via other platforms, for example, where access to certain share classes is restricted. This may lead to differences in allocation and performance.

# Active MPS 2

As at 31 October 2023

## Investment objective

AJ Bell Active MPS 2 aims to make an average return in line with inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

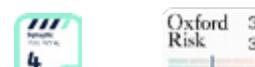

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. The portfolio looks to gain exposure to high quality active managers who have the potential to outperform markets over time, but it will only use these where there is conviction that this still makes financial sense after fees have been deducted. Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

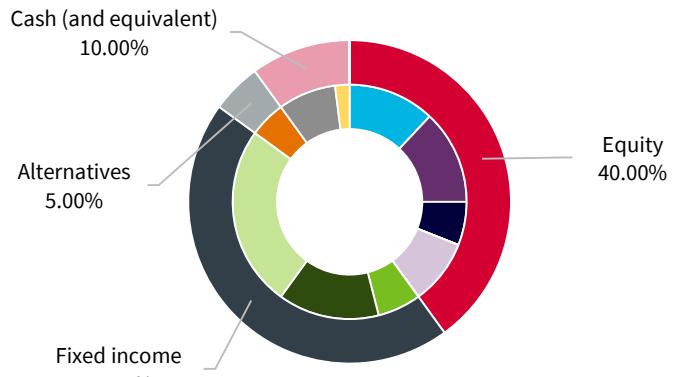

## Risk profile<sup>(1)</sup>

For investors who can tolerate some shorter-term capital loss from their portfolio, as markets fluctuate.

The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

## Asset allocation<sup>(2)</sup>

# Active MPS 5

As at 31 October 2023

## Investment objective

AJ Bell Active MPS 5 aims to make an average return above the level of inflation (as measured by the consumer price index) over a period of at least five years. In favourable market conditions returns may be higher. Over shorter periods the portfolio may suffer significant losses in capital value, as it invests in securities that can go both up and down in price, with large weights in emerging markets.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. The portfolio looks to gain exposure to high quality active managers who have the potential to outperform markets over time, but it will only use these where there is conviction that this still makes financial sense after fees have been deducted. Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile<sup>(1)</sup>

For investors who understand the risk and reward relationship of pure equity portfolios over the short, medium and long term.  
The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

Source: Morningstar as at 31 October 2023.

Performance is calculated on a net of fees basis. Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the portfolio. However, to give context and enable an objective assessment of the portfolio's performance, the IA (Investment Association) Flexible Investment sector average is included for reference. The portfolio does not aim to track the IA sector as a benchmark.

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings. This model was launched on 19 February 2018.

## Fees and charges

Ongoing charges figure (OCF)	0.89%
Transaction costs	0.19%
Total indicative charge	1.08%

Ongoing Charges Figure (OCF) is inclusive of the AJ Bell Investments Annual Management Charge (fee of 0.15%) and the ongoing charges of underlying investments. MPS transaction costs reflect the aggregated transaction costs reported by underlying products. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. Any charges payable to your financial adviser will apply in addition. There is no set minimum into the MPS, however, the structure of the underlying investments means that the portfolios work more efficiently for investments above a certain size. For the Active MPS, this is around £10,000. It should be noted that the smaller the investment amount, the greater the impact of transaction costs will be on the investment.

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each portfolio is likely to vary from its average over time. This is measured on a forward looking basis and is used to help you understand the level of risk taken in each portfolio.

Expected volatility	12.60% - 14.70%
---------------------	-----------------

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time. For further details of all applicable costs, please speak to your financial adviser or visit [www.investcentre.co.uk](http://www.investcentre.co.uk).

(1) The AJ Bell Managed Portfolio Service (MPS) have been risk mapped by independent risk profiling services. View our Risk Profiling Tools document on [www.investcentre.co.uk/support/infocentre](http://www.investcentre.co.uk/support/infocentre) for further information on our risk profilers. The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Allocation and performance information contained in this document is representative of the standard Active MPS 5 model held on AJ Bell Investcentre. The implementation of this model may vary when held via other platforms, for example, where access to certain share classes is restricted. This may lead to differences in allocation and performance.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

# Active MPS 6

As at 31 October 2023

## Investment objective

AJ Bell Active MPS 6 aims to make an average return substantially ahead of inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may suffer significant losses in capital value, as it invests in securities that can go both up and down in price, with large weights in emerging markets and high growth companies.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. The portfolio looks to gain exposure to high quality active managers who have the potential to outperform markets over time, but it will only use these where there is conviction that this still makes financial sense after fees have been deducted. Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile<sup>(1)</sup>

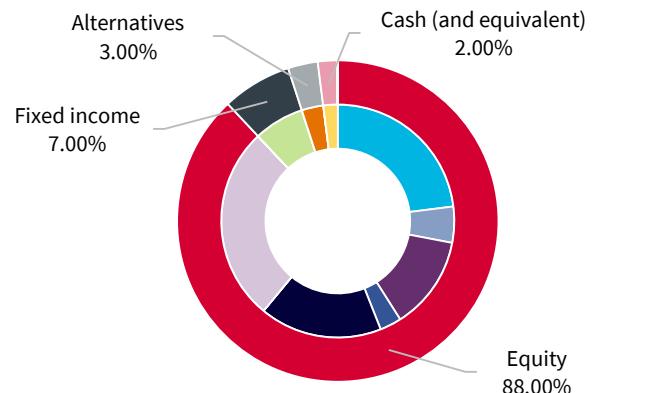

For investors who understand the risk and reward relationship of pure equity portfolios over the short, medium and long term. The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

# Pactive MPS 1

As at 31 October 2023

## Investment objective

AJ Bell Pactive MPS 1 aims to make a positive return when measured over a period of at least five years, this may be less than the level of inflation (as measured by the consumer price index). Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products mainly hold typically lower risk assets such as cash and bonds, with smaller holdings in company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. The portfolio looks to gain exposure to high quality active managers who have the potential to outperform markets over time, but it will only use these where there is conviction that this still makes financial sense after fees have been deducted. Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

Source: Morningstar as at 31 October 2023.

Performance is calculated on a net of fees basis. Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the portfolio. However, to give context and enable an objective assessment of the portfolio's performance, the IA (Investment Association) Mixed Investment 0-35% Shares sector average is included for reference. The portfolio does not aim to track the IA sector as a benchmark.

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings. This model was launched on 18 February 2019.

## Fees and charges

Ongoing charges figure (OCF)	0.51%
Transaction costs	0.08%
Total indicative charge	0.59%

Ongoing Charges Figure (OCF) is inclusive of the AJ Bell Investments Annual Management Charge (fee of 0.15%) and the ongoing charges of underlying investments. MPS transaction costs reflect the aggregated transaction costs reported by underlying products. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. Any charges payable to your financial adviser will apply in addition. There is no set minimum into the MPS, however, the structure of the underlying investments means that the portfolios work more efficiently for investments above a certain size. For the Pactive MPS, this is around £20,000. It should be noted that the smaller the investment amount, the greater the impact of transaction costs will be on the investment.

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each portfolio is likely to vary from its average over time. This is measured on a forward looking basis and is used to help you understand the level of risk taken in each portfolio.

Expected volatility	4.20% - 6.30%
---------------------	---------------

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time. For further details of all applicable costs, please speak to your financial adviser or visit [www.investcentre.co.uk](http://www.investcentre.co.uk).

(1) The AJ Bell Managed Portfolio Service (MPS) have been risk mapped by independent risk profiling services. View our Risk Profiling Tools document on [www.investcentre.co.uk/support/infocentre](http://www.investcentre.co.uk/support/infocentre) for further information on our risk profilers. The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Allocation and performance information contained in this document is representative of the standard Pactive MPS 1 model held on AJ Bell Investcentre. The implementation of this model may vary when held via other platforms, for example, where access to certain share classes is restricted. This may lead to differences in allocation and performance.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

# Pactive MPS 2

As at 31 October 2023

## Investment objective

AJ Bell Pactive MPS 2 aims to make an average return in line with inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. The portfolio looks to gain exposure to high quality active managers who have the potential to outperform markets over time, but it will only use these where there is conviction that this still makes financial sense after fees have been deducted. Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

# Pactive MPS 5

As at 31 October 2023

## Investment objective

AJ Bell Pactive MPS 5 aims to make an average return above the level of inflation (as measured by the consumer price index) over a period of at least five years. In favourable market conditions returns may be higher. Over shorter periods the portfolio may suffer significant losses in capital value, as it invests in securities that can go both up and down in price, with large weights in emerging markets.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. The portfolio looks to gain exposure to high quality active managers who have the potential to outperform markets over time, but it will only use these where there is conviction that this still makes financial sense after fees have been deducted. Our focus on long-term investing helps minimise transaction costs, ensuring there is a minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

(3) The above table shows the total return of the portfolio during each one-year time period stated.

Cumulative (non-annualised %)	Oct 2022 - Oct 2023	Oct 2021 - Oct 2023	Oct 2020 - Oct 2023	Oct 2019 - Oct 2023
Pactive MPS 5	3.07	0.17	24.68	24.26
IA Flexible Investment	1.86	-8.41	10.88	11.64
IA Sector quartile	2nd	1st	1st	1st

(4) The above table shows the total return of the portfolio on a cumulative basis over the previous four years. This is taken from the most recent month end.

Source: Morningstar as at 31 October 2023.

Performance is calculated on a net of fees basis. Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the portfolio. However, to give context and enable an objective assessment of the portfolio's performance, the IA (Investment Association) Flexible Investment sector average is included for reference. The portfolio does not aim to track the IA sector as a benchmark.

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings. This model was launched on 18 February 2019.

## Fees and charges

Ongoing charges figure (OCF)	0.67%
Transaction costs	0.12%
Total indicative charge	0.80%

Ongoing Charges Figure (OCF) is inclusive of the AJ Bell Investments Annual Management Charge (fee of 0.15%) and the ongoing charges of underlying investments. MPS transaction costs reflect the aggregated transaction costs reported by underlying products. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. Any charges payable to your financial adviser will apply in addition. There is no set minimum into the MPS, however, the structure of the underlying investments means that the portfolios work more efficiently for investments above a certain size. For the Pactive MPS, this is around £20,000. It should be noted that the smaller the investment amount, the greater the impact of transaction costs will be on the investment.

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each portfolio is likely to vary from its average over time. This is measured on a forward looking basis and is used to help you understand the level of risk taken in each portfolio.

Expected volatility	12.60% - 14.70%
---------------------	-----------------

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time. For further details of all applicable costs, please speak to your financial adviser or visit [www.investcentre.co.uk](http://www.investcentre.co.uk).

(1) The AJ Bell Managed Portfolio Service (MPS) have been risk mapped by independent risk profiling services. View our Risk Profiling Tools document on [www.investcentre.co.uk/support/infocentre](http://www.investcentre.co.uk/support/infocentre) for further information on our risk profilers. The assigned risk profiles do not indicate a promise, forecast or illustration of future volatility or returns nor represent investment advice or a recommendation to buy or sell units/shares in a fund or portfolio.

Allocation and performance information contained in this document is representative of the standard Pactive MPS model held on AJ Bell Investcentre. The implementation of this model may vary when held via other platforms, for example, where access to certain share classes is restricted. This may lead to differences in allocation and performance.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

This information is for indicative purposes only and is not intended, and should not be construed, as investment advice. The information and data presented in this document were believed to be correct at the time of writing and we are not liable for any subsequent changes.

# Pactive MPS 6

As at 31 October 2023

## Investment objective

AJ Bell Pactive MPS 6 aims to make an average return substantially ahead of inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may suffer significant losses in capital value, as it invests in securities that can go both up and down in price, with large weights in emerging markets and high growth companies.

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products hold different types of securities such as cash and bonds and company shares.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

The portfolio invests in a wide range of strategies that may include both actively managed and passive strategies to gain exposure to a variety of asset classes across a diversified range of global markets. # Responsible MPS 1

As at 31 October 2023

## Investment objective

AJ Bell Responsible MPS 1 aims to make a positive return when measured over a period of at least five years, this may be less than the level of inflation (as measured by the consumer price index). Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price. The portfolio aims to have minimal exposure to companies generating sales from areas such as tobacco and alcohol, and higher exposure to companies with stronger environmental, governance or social practices (known as ESG).

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing in collective investments, such as funds and ETFs. These products mainly hold typically lower risk assets such as cash and bonds, with smaller holdings in company shares. Where possible we choose products that screen out companies generating substantial revenue from certain business involvements that may be deemed by some as controversial or immoral. These include but are not limited to gambling, certain fossil fuels and genetically modified organisms or companies that are deemed to be in breach of the UN Global Compact. In addition, we look for products that overweight companies with stronger environmental, social or governance practices compared to other companies in the same sector, as determined by ESG rating companies such as MSCI.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. Alongside investments in low-cost instruments, such as ETFs and Index funds, the portfolio has a substantial holding in the VT AJ Bell Responsible Growth fund. This is done for portfolio efficiency. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

# Responsible MPS 2

As at 31 October 2023

## Investment objective

AJ Bell Responsible MPS 2 aims to make an average return in line with inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may lose value as it invests in securities that can go both up and down in price. The portfolio aims to have minimal exposure to companies generating sales from areas such as tobacco and alcohol, and higher exposure to companies with stronger environmental, governance or social practices (known as ESG).

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing in collective investments, such as funds and ETFs. These products hold a combination of cash, bonds and company shares, with a bias towards cash and bonds. Where possible we choose products that screen out companies generating substantial revenue from certain business involvements that may be deemed by some as controversial or immoral. These include but are not limited to gambling, certain fossil fuels and genetically modified organisms or companies that are deemed to be in breach of the UN Global Compact. In addition, we look for products that overweight companies with stronger environmental, social or governance practices compared to other companies in the same sector, as determined by ESG rating companies such as MSCI.

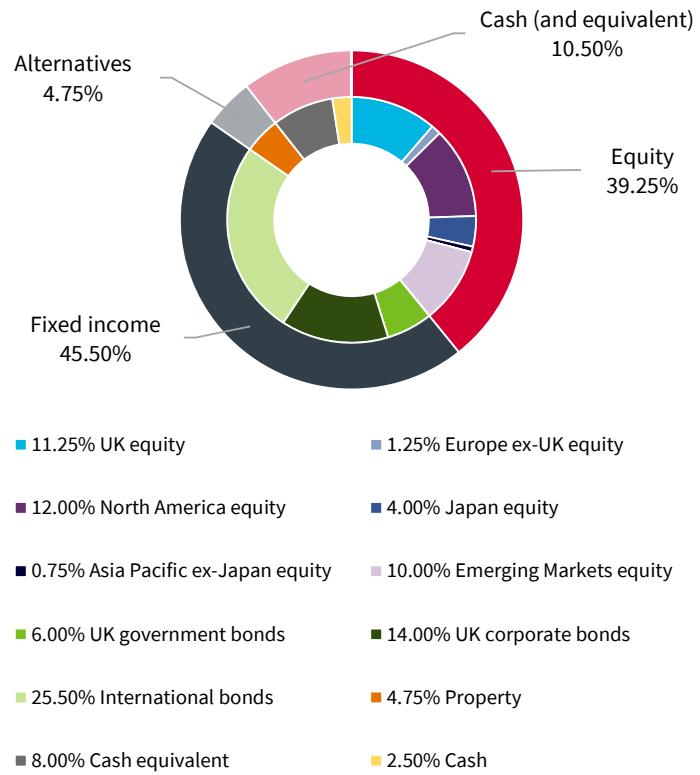

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. Alongside investments in low-cost instruments, such as ETFs and Index funds, the portfolio has a substantial holding in the VT AJ Bell Responsible Growth fund. This is done for portfolio efficiency. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile

For investors who can tolerate some shorter-term capital loss from their portfolio, as markets fluctuate. The portfolio invests in funds and exchange traded funds (ETFs), using a defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

# Responsible MPS 3

As at 31 October 2023

## Investment objective

AJ Bell Responsible MPS 3 aims to make an average return at least in line with the level of inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may lose value, including sharp falls in certain market conditions, as it invests in securities that can go both up and down in price. The portfolio aims to have minimal exposure to companies generating sales from areas such as tobacco and alcohol, and higher exposure to companies with stronger environmental, governance or social practices (known as ESG).

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing in collective investments, such as funds and ETFs. These products hold a combination of cash, bonds, and company shares, with a bias towards company shares. Where possible we choose products that screen out companies generating substantial revenue from certain business involvements that may be deemed by some as controversial or immoral. These include but are not limited to gambling, certain fossil fuels and genetically modified organisms or companies that are deemed to be in breach of the UN Global Compact. In addition, we look for products that overweight companies with stronger environmental, social or governance practices compared to other companies in the same sector, as determined by ESG rating companies such as MSCI.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. Alongside investments in low-cost instruments, such as ETFs and Index funds, the portfolio has a substantial holding in the VT AJ Bell Responsible Growth fund. This is done for portfolio efficiency. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

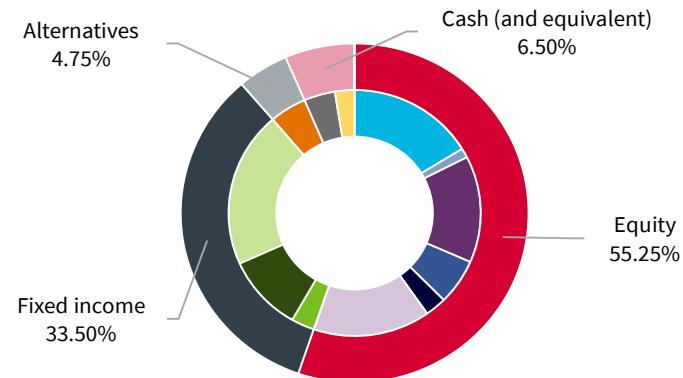

## Risk profile

For investors who can tolerate larger short term dips in portfolio value and understand the importance of investing for the long term to help in achieving higher overall returns.

The portfolio invests in funds and exchange traded funds (ETFs), using a defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

## Asset allocation<sup>(1)</sup>

■ 16.25% UK equity	■ 1.25% Europe ex-UK equity
■ 14.00% North America equity	■ 6.00% Japan equity
■ 2.75% Asia Pacific ex-Japan equity	■ 15.00% Emerging Markets equity
■ 3.00% UK government bonds	■ 10.00% UK corporate bonds
■ 20.50% International bonds	■ 4.75% Property
■ 4.00% Cash equivalent	■ 2.50% Cash

(1) Asset allocation is based on the target active holdings combined with the underlying holdings of the VT AJ Bell Responsible Growth Fund. Totals may not sum to 100% due to rounding.

## Platform availability

## Performance

Discrete (%)	Oct 2022 - Oct 2023	Oct 2021 - Oct 2022
Responsible MPS 3	1.31	-9.99
IA Mixed Investment 40-85% Shares	1.96	-10.63
IA Sector quartile	3rd	2nd

(3) The above table shows the total return of the portfolio during each one-year time period stated.

Cumulative (non-annualised %)	Oct 2022 - Oct 2023	Oct 2021 - Oct 2023
Responsible MPS 3	1.31	-8.80
IA Mixed Investment 40-85% Shares	1.96	-8.88
IA Sector quartile	3rd	2nd

(4) The above table shows the total return of the portfolio on a cumulative basis over the previous two years. This is taken from the most recent month end.

Source: Morningstar as at 31 October 2023.

Performance is calculated on a net of fees basis. Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the portfolio. However, to give context and enable an objective assessment of the portfolio's performance, the IA (Investment Association) Mixed Investment 40-85% Shares sector average is included for reference. The portfolio does not aim to track the IA sector as a benchmark.

Performance reflects the headline model and includes the underlying costs of the holdings and the annual investment management charge. It does not include any transaction costs that would have been incurred through rebalancing or changing any underlying holdings. This model was launched on 01 March 2021.

## Fees and charges

Ongoing charges figure (OCF)	0.40%
Transaction costs	0.08%
Total indicative charge	0.48%

Ongoing Charges Figure (OCF) is inclusive of the AJ Bell Investments Annual Management Charge (fee of 0.15%) and the ongoing charges of underlying investments. MPS transaction costs reflect the aggregated transaction costs reported by underlying products. In some instances products may deploy pricing mechanisms which can result in negative costs. Additional costs will be incurred while using the MPS. These include (where applicable) product costs and dealing costs. Any charges payable to your financial adviser will apply in addition. There is no set minimum into the MPS, however, the structure of the underlying investments means that the portfolios work more efficiently for investments above a certain size. For the Responsible MPS, this is around £20,000. It should be noted that the smaller the investment amount, the greater the impact of transaction costs will be on the investment.

Each portfolio has an expected level of risk, measured by volatility. This is a statistical measurement of how widely the returns of each portfolio is likely to vary from its average over time. This is measured on a forward looking basis and is used to help you understand the level of risk taken in each portfolio.

Expected volatility	8.40% - 10.50%
---------------------	----------------

Subject to regulatory requirements, the portfolio will normally remain fully invested. There is, however, no restriction on the underlying content of the investments held in terms of investment type and geographical or economic sector (other than those imposed by the regulations). This means that AJ Bell Investments can, at its own discretion, weight the portfolio towards any investment type or sector, including cash, at any time. For further details of all applicable costs, please speak to your financial adviser or visit [www.investcentre.co.uk](http://www.investcentre.co.uk).

Allocation and performance information contained in this document is representative of the standard Responsible MPS 3 model held on AJ Bell Investcentre. The implementation of this model may vary when held via other platforms, for example, where access to certain share classes is restricted. This may lead to differences in allocation and performance.

Past performance is not indicative of future performance. The value of investments may go down as well as up and the income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

Where practical the Responsible portfolios invest in products tracking MSCI Socially Responsible Investing (SRI) indexes for equity exposure. These indexes exclude companies with certain controversial business involvements and also utilise MSCI's Environmental Social Governance (ESG) ratings and ESG Controversy assessments. For further details please see MSCI's latest SRI Indexes Methodology document.

# Responsible MPS 4

As at 31 October 2023

## Investment objective

AJ Bell Responsible MPS 4 aims to make an average return above the level of inflation (as measured by the consumer price index) over a period of at least five years. Over shorter periods the portfolio may lose value, including sharp falls in certain market conditions, as it invests in securities that can go both up and down in price. The portfolio aims to have minimal exposure to companies generating sales from areas such as tobacco and alcohol, and higher exposure to companies with stronger environmental, governance or social practices (known as ESG).

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing in collective investments, such as funds and ETFs. These products mainly invest in company shares, with small holdings in bonds from both companies and governments. Where possible we choose products that screen out companies generating substantial revenue from certain business involvements that may be deemed by some as controversial or immoral. These include but are not limited to gambling, certain fossil fuels and genetically modified organisms or companies that are deemed to be in breach of the UN Global Compact. In addition, we look for products that overweight companies with stronger environmental, social or governance practices compared to other companies in the same sector, as determined by ESG rating companies such as MSCI.

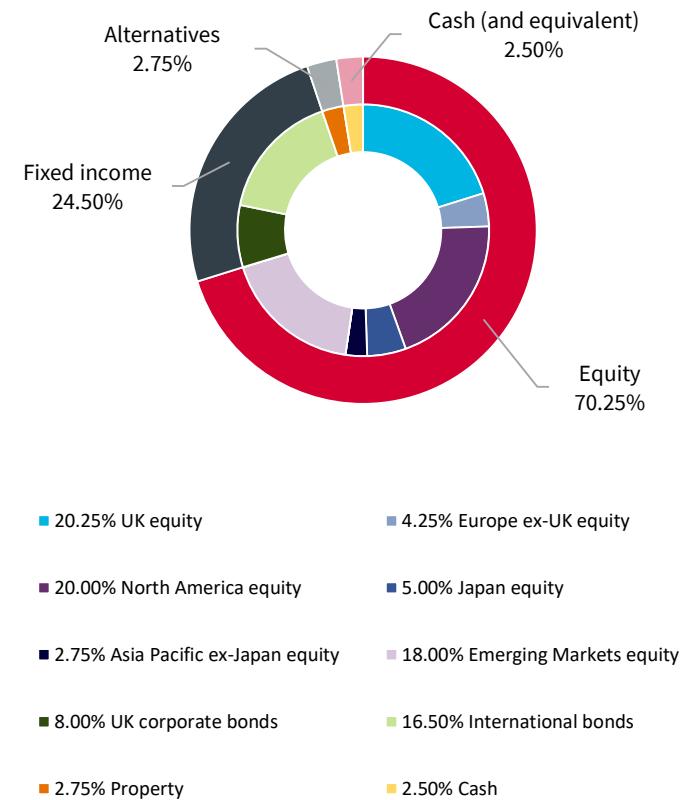

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk. Alongside investments in low-cost instruments, such as ETFs and Index funds, the portfolio has a substantial holding in the VT AJ Bell Responsible Growth fund. This is done for portfolio efficiency. Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the portfolio, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

## Risk profile

For investors who understand risk and appreciate how this can be mitigated with long-term planning.  
The portfolio invests in funds and exchange traded funds (ETFs), using defined strategic asset allocation to deliver returns while meeting the targeted level of risk.

# Responsible MPS 5

As at 31 October 2023

## Investment objective

AJ Bell Responsible MPS 5 aims to make an average return above the level of inflation (as measured by the consumer price index) over a period of at least five years. In favourable market conditions returns may be higher. Over shorter periods the portfolio may suffer significant losses in capital value, as it invests in securities that can go both up and down in price, with large weights in emerging markets. The portfolio aims to have minimal exposure to companies generating sales from areas such as tobacco and alcohol, and higher exposure to companies with stronger environmental, governance or social practices (known as ESG).

## Investment approach

By spreading out the investments across regions, sectors and different types of assets, the portfolio aims to achieve its return objective whilst minimising price variation where possible. It does so by investing in collective investments, such as funds and ETFs.
